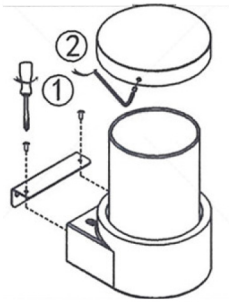
Installation instructions

Cairn Concrete Outdoor Wall Light

Cylinder model illustrated

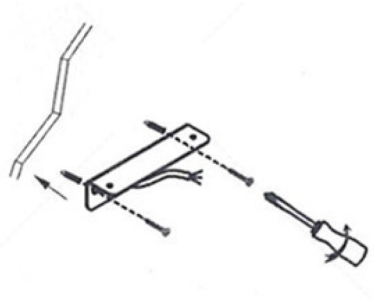
POWER OFF Disconnect the power supply before installation.

1 Prepare for installation



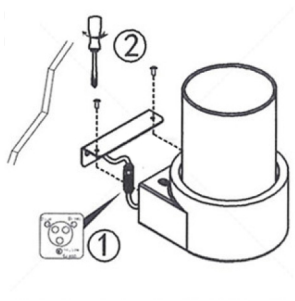
Disconnect the power. Remove the top cover and mounting bracket. Mark the bracket holes on the wall, drill the holes and insert wall plugs.

2 Fix the mounting bracket



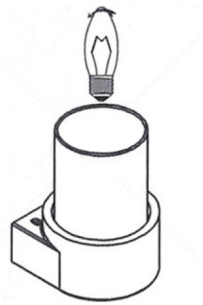
Secure the mounting bracket to the wall with the self-tapping screws.

3 Connect and secure



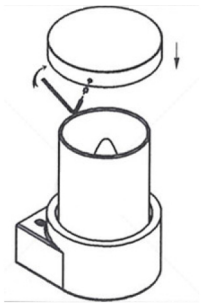
Connect the mains supply to the light correctly. Fasten the light body to the mounting bracket with the screws.

4 Install the bulb



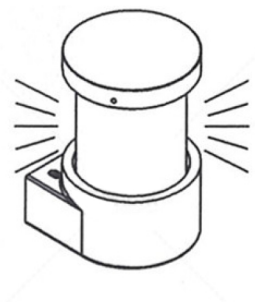
Screw the bulb into the lamp holder.

5 Refit the top cover



Replace the top cover and secure it to the light body with the screw.

6 Complete and test



Check that the light is securely assembled. Restore the power and test the light.
