8 small steps to get started

01 Browse	02 Choose	03 Look around	04 Arrange
05 Review	06 Get inspired	07 Set the mood	08 Save

01 Find your pieces

Browse and add pieces

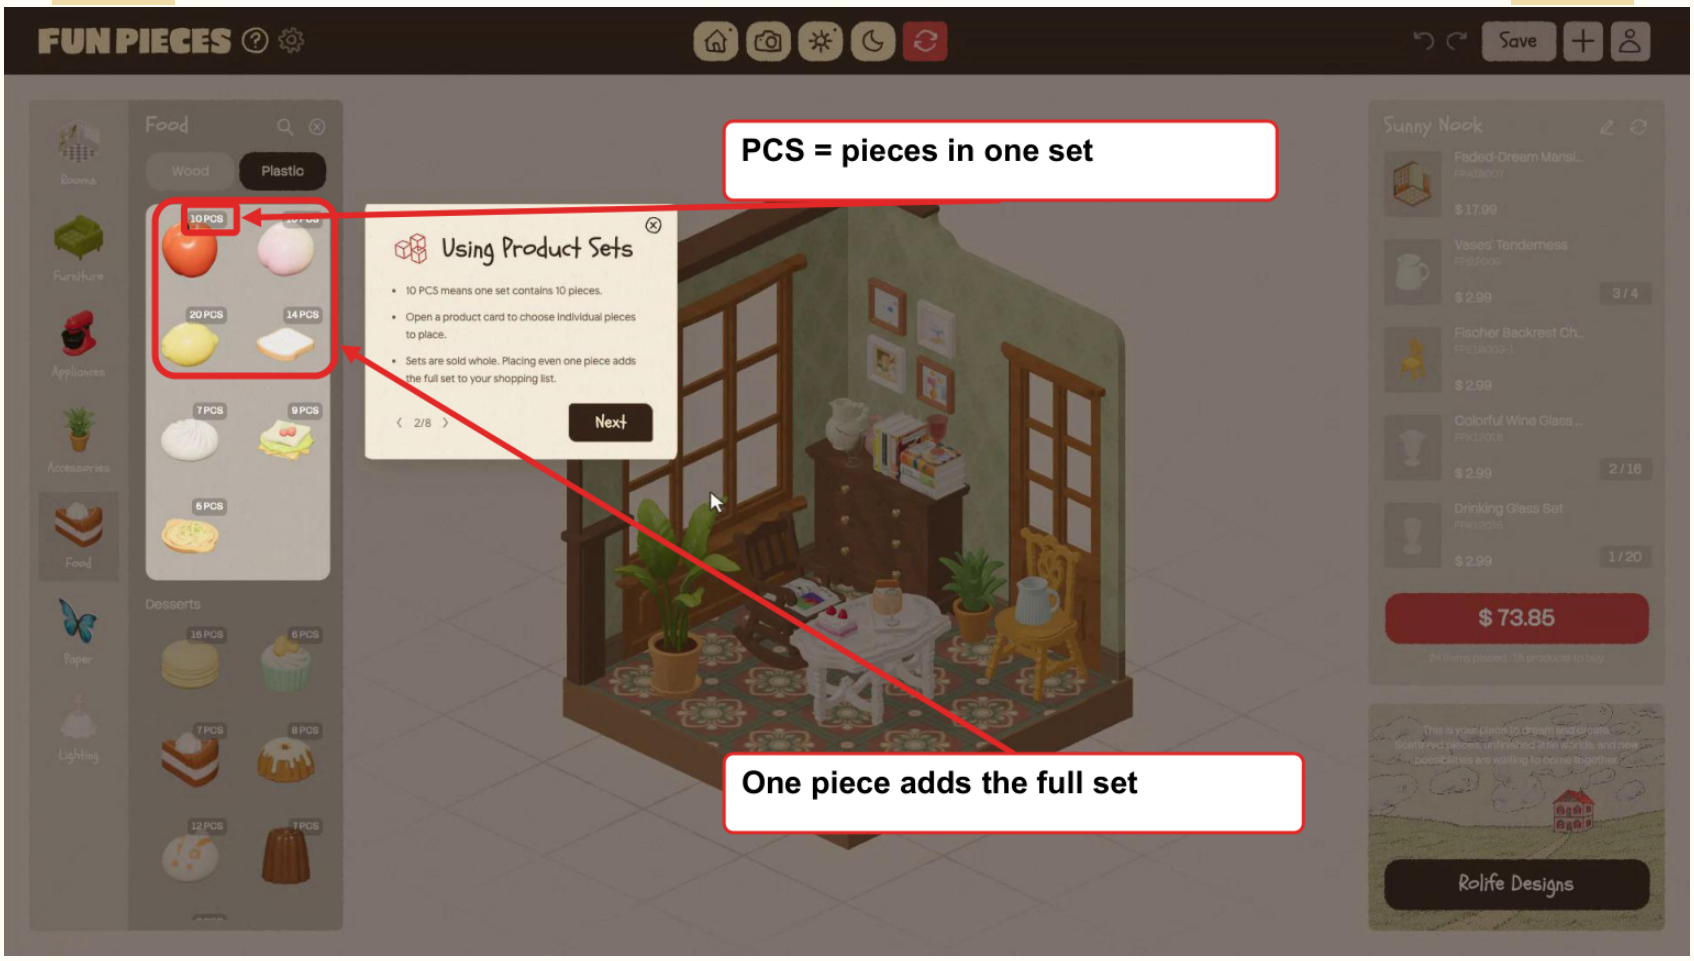

- **Browse the catalog:** Use the categories on the left: Rooms, Furniture, Appliances, Accessories, Food, Paper and Lighting.
- **Switch or search:** Switch between Wood and Plastic, or search by product name or model number.
- **Add pieces:** Choose a product to add its pieces to your room. See the next page for products sold as sets.

Little tip Start with the catalog on the left, then arrange your pieces in the central room view.

02 A set full of possibilities

Choose pieces from a set

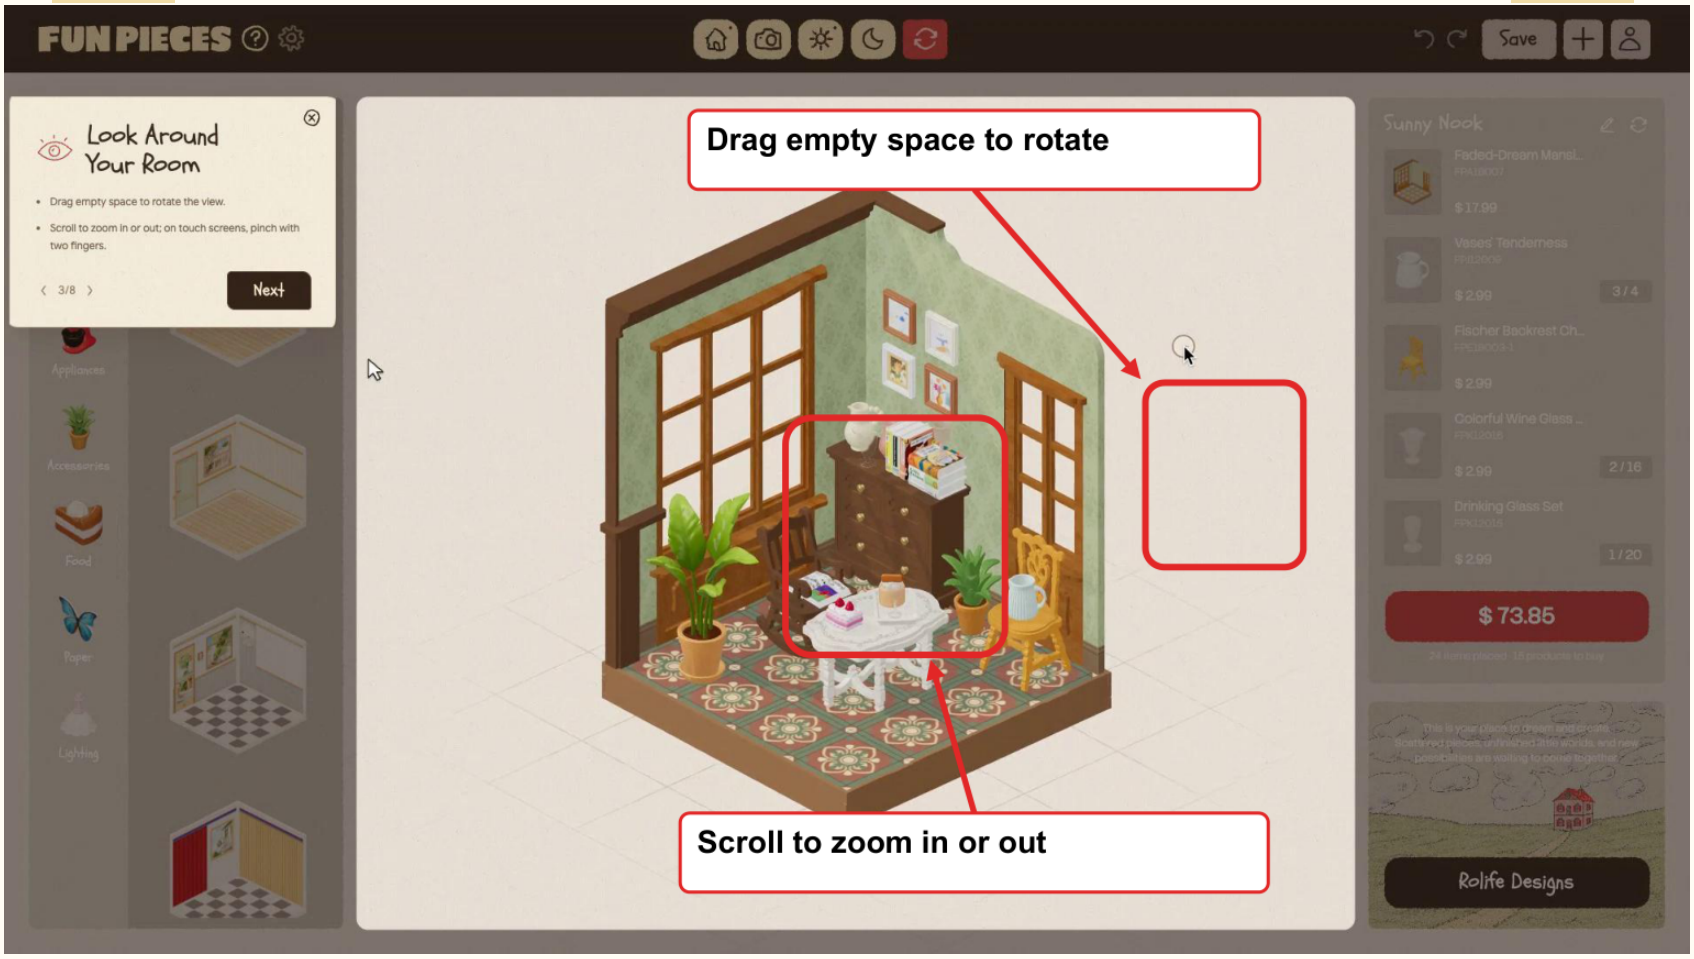

- **Read the piece count:** 10 PCS means one set contains 10 pieces. It does not mean 10 pieces have already been placed.
- **Choose individual pieces:** Open a product card and select the pieces you want to place in your room.
- **Understand the purchase unit:** Sets are sold whole. Placing even one piece adds the full set to your shopping list.

Little tip You can use just one piece in your design, but the purchase unit is still the full set.

03 Take a look around

Rotate and zoom the view

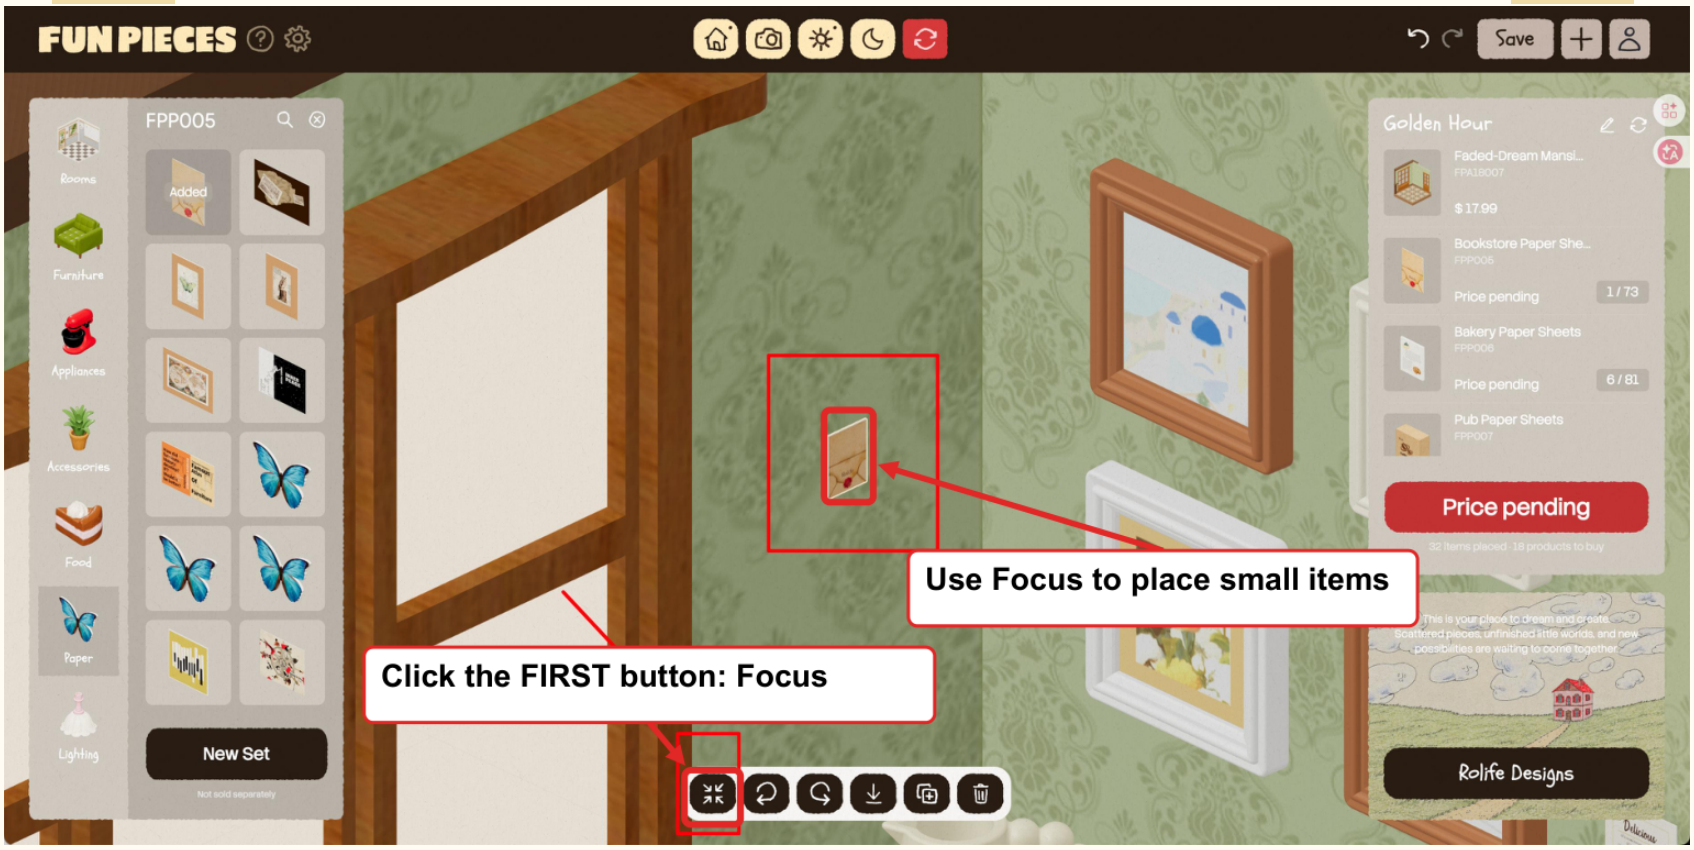

- **Rotate the view:** Drag empty space in the central canvas to look around your room.
- **Zoom in or out:** Use the mouse wheel to zoom. On a touchscreen, pinch with two fingers.
- **Check the arrangement:** View furniture and decorations from different angles, then zoom in to inspect the details.

Little tip Drag empty space to rotate the view. Dragging a selected piece moves the piece.

04 Small pieces, closer view

Move and edit pieces

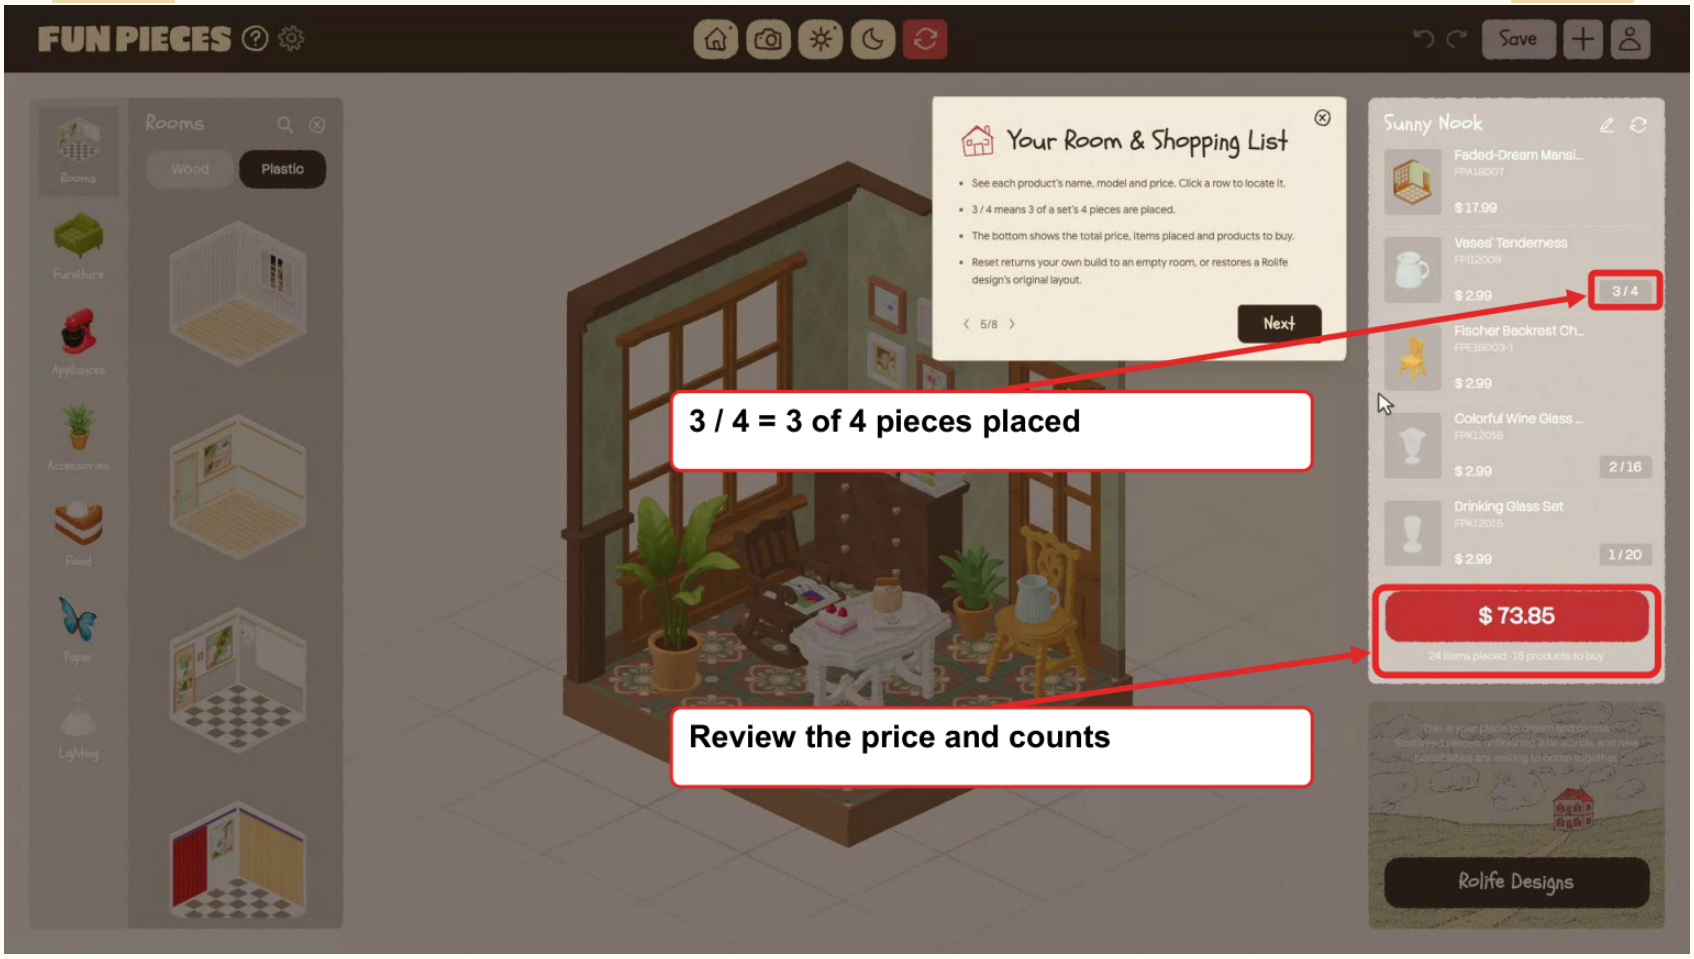

- **Select and move:** Select a piece to reveal the toolbar below the room. Drag to move it and use the curved arrow to rotate it.
- **Use Focus for small items:** Stickers and other small items can be difficult to position. Select the item, then click Focus—the first button from the left, marked with an arrow in the screenshot—to get a closer view. Drag or rotate the item to adjust its placement.
- **Duplicate or delete:** Duplicate creates a copy. Delete removes the selected piece and any items resting on it. The +number indicates how many extra items are included.
- **Change placement options:** For supported pieces, toggle wall snapping or switch between upright, flat and wall-mounted poses.

Little tip Before deleting a supporting piece such as a table, check which items resting on it will also be removed.

05 Know what is in your room

Review your room and shopping list

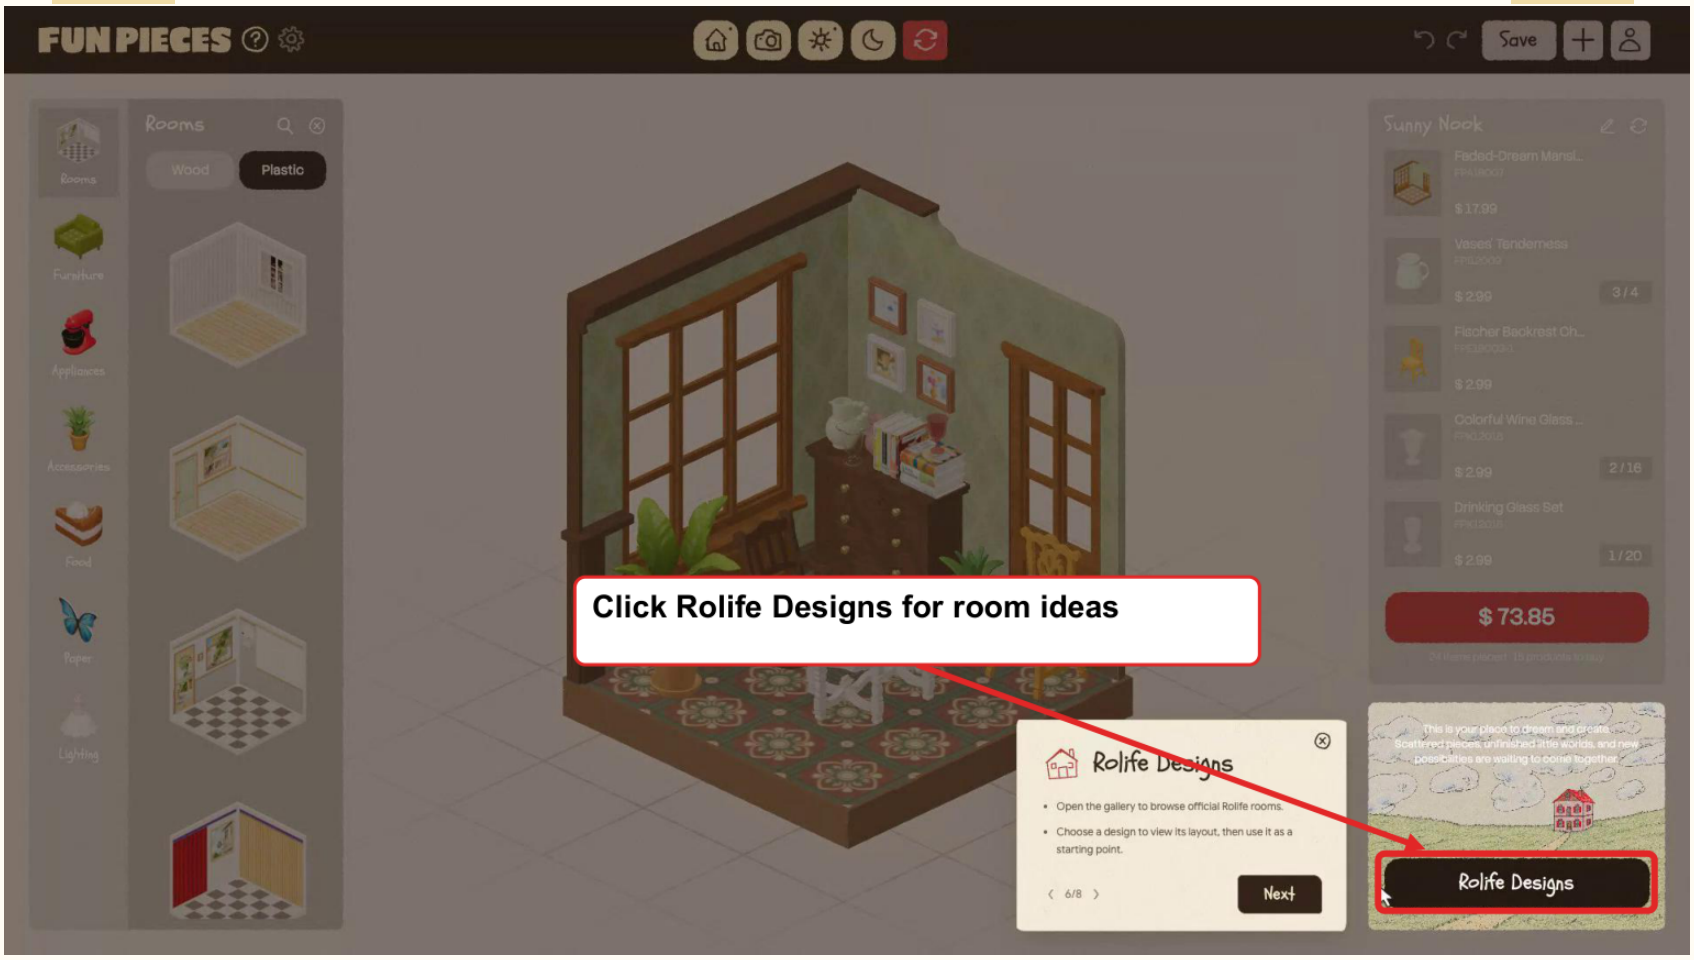

- **Inspect and locate products:** The list on the right shows each product's name, model and price. Click a row to locate the product.
- **Read the counts:** 3 / 4 means 3 of a set's 4 pieces are placed. The bottom shows the total price, items placed and products to buy.
- **Reset the layout:** Reset returns your own build to an empty room, or restores a Rolife design's original layout.

Little tip Read the placed-piece count together with the full-set purchase rule. Screenshot prices are examples from the video.

06 A little inspiration

Start with a Rolife design

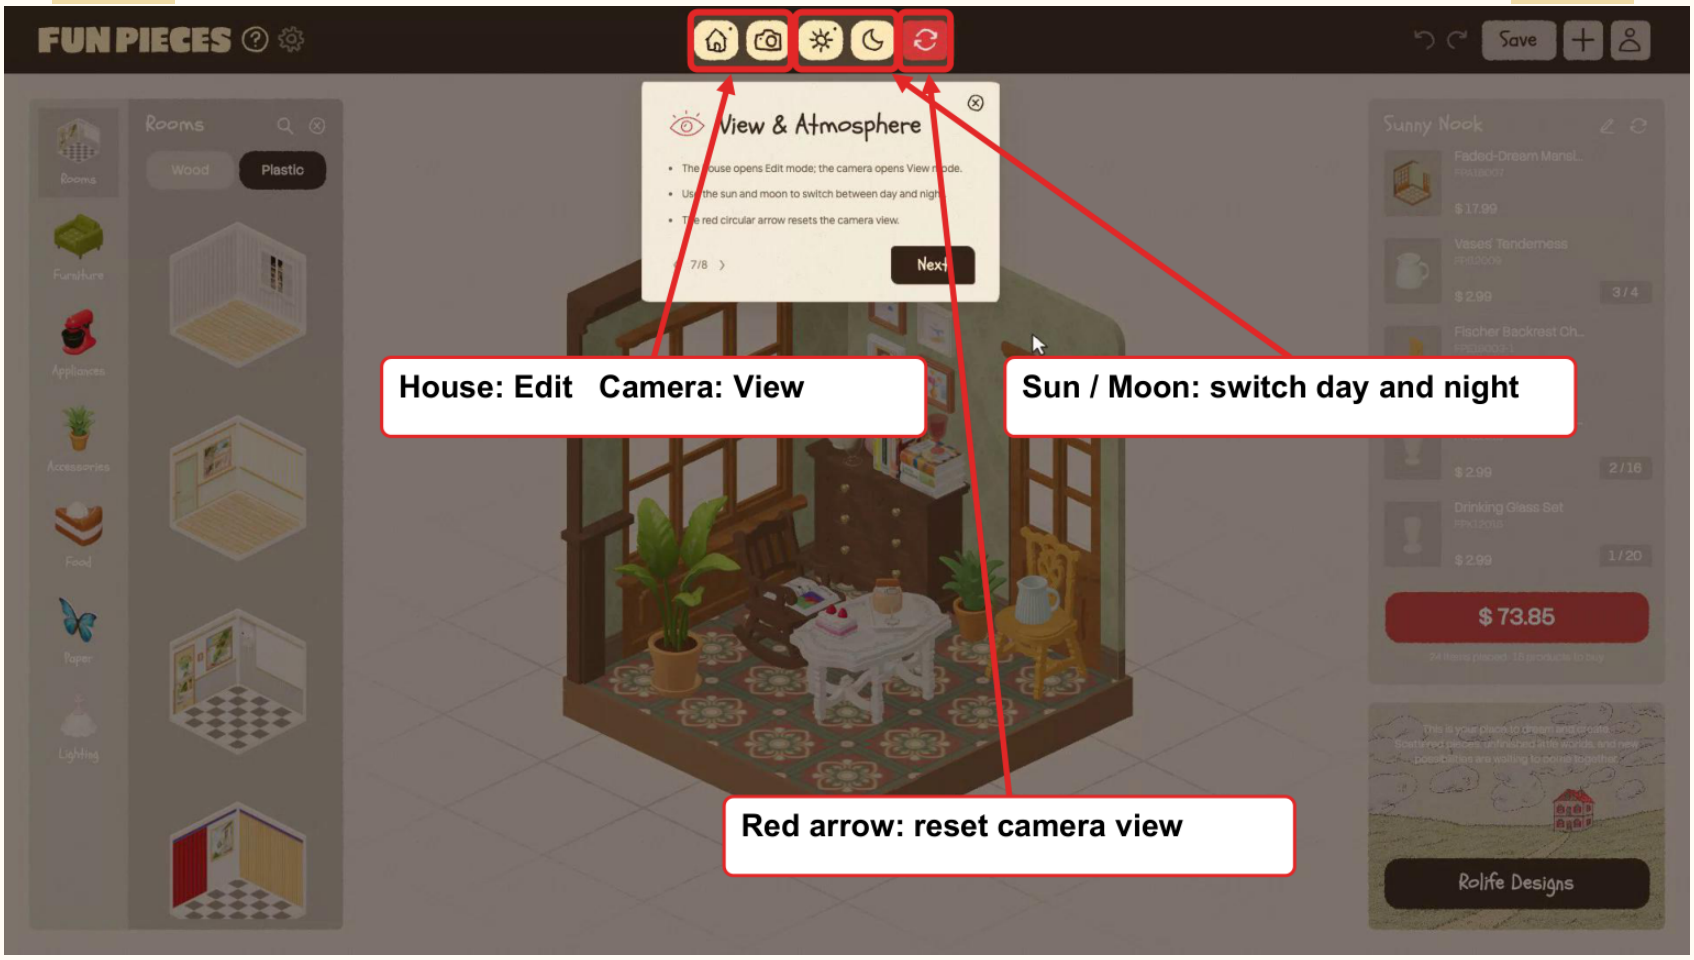

- **Open the gallery:** Click Rolife Designs at the bottom right to browse official Rolife rooms.
- **View a design:** Choose a design to see its layout.
- **Make it your own:** Use the design as a starting point, then adjust the arrangement to suit your ideas.

Little tip Choose an official design if you would prefer an existing layout as your starting point.

07 Set the mood

Change the mode and atmosphere

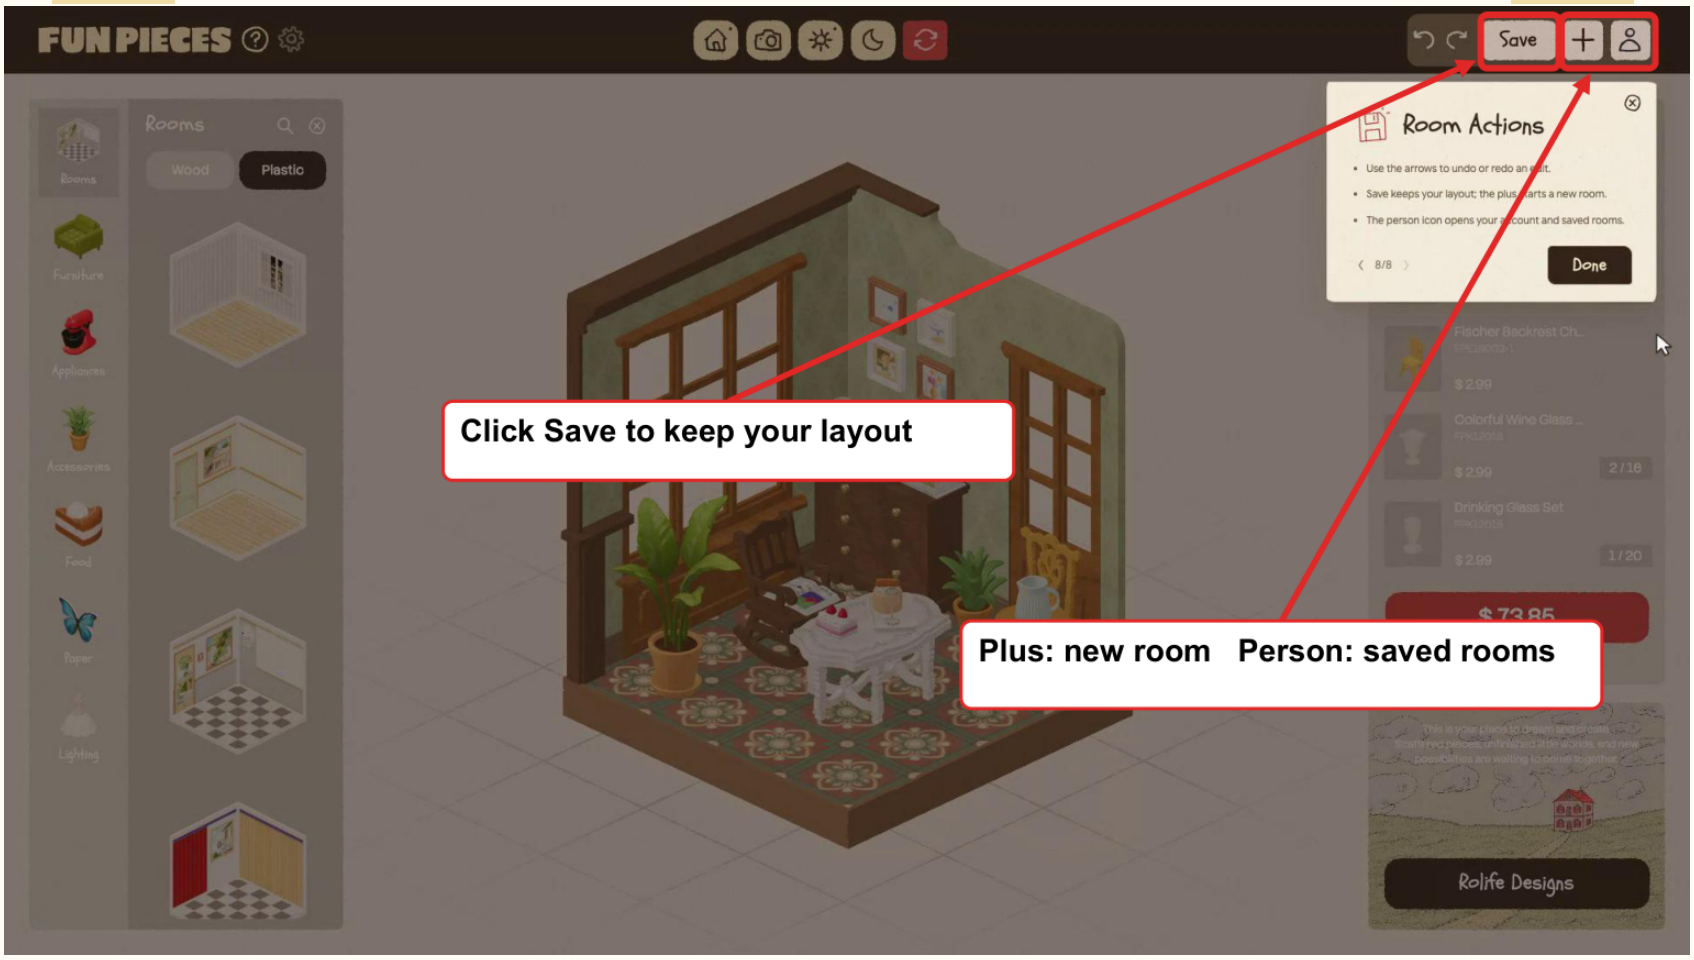

- **Switch modes:** The house icon at the top opens Edit mode. The camera icon opens View mode.
- **Switch day and night:** Use the sun and moon icons to change between day and night.
- **Reset the camera:** Click the red circular arrow to reset the camera view.

Little tip The red arrow resets the camera view. Reset in the room panel resets the layout.

08 Keep your creation

Save and manage your rooms

- **Undo or redo:** Use the two curved arrows at the top right to undo or redo an edit.
- **Save or start a new room:** Click Save to keep your current layout. Click the plus icon to start a new room.
- **Find saved rooms:** The person icon opens your account and saved rooms. Click Done to finish the guided tour.

Little tip Save your finished layout before starting a new room.

Based on the supplied tutorial video, with added guidance for small items.
