SUPPORT YOUR IMAGINATION

| About Selens

Selens was founded in 2011 and has been in the industry of photography lighting equipment and related accessories for 12 years. Selens is committed to provide excellent solutions to behind-the-scenes workers in the field of photography and film making. We attach great importance to user experience and listen carefully to needs and desires, which inspires us to create better products that help users to complete their jobs more easily and efficiently.

Selens' products focus on user-friendly, simple and convenient concepts, allowing users to focus on creation and allowing imagination to be freely released without the constraints of technical problems.

Selens products are engineered to provide incredible strength and durability in the toughest environments and are recognized by industry professionals.

APOLLO COB Light Series

APOLLO COB Lights

Apollo 100 100W
Point-Source LED
(5600K)

SLC4-100

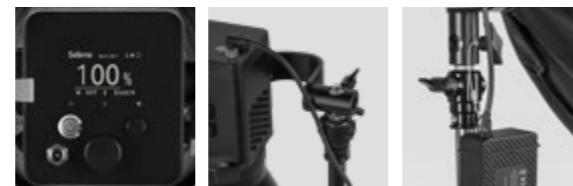

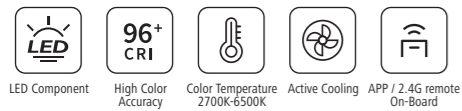

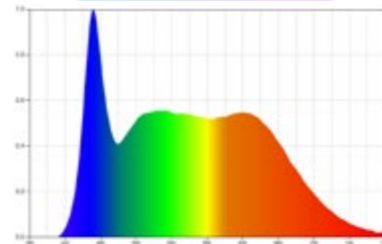

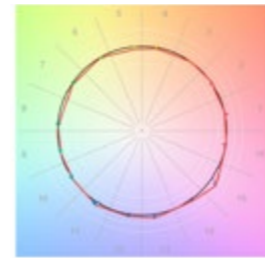

Apollo 100X 100W
Bi-Color Point-Source LED
(2700K-6500K)

SLC4-100X

APOLLO

APOLLO 100W Point-Source LED

- Output Power: 100W
- Apollo 100 illuminance 71,500Lux@1m (5600K with hyper reflector)
- Apollo 100X illuminance 69,400Lux@1m (5600K with hyper reflector)
- CRI and TLCI ≥ 96 , High Color Accuracy
- 8 Lighting FX with 9 levels of adjustable speed
- 4 Dimmer curves (Liner, Exp, Logarithmic, S-Curve)
- The front of the COB component is protected by glass
- Active cooling, working noise ≤ 28 dB
- 3 light control methods (On-Board, 2.4G remote, Selens Link App) support group control lighting
- Bowens mount design
- 3 power supply methods (AC/DC power supply, V-Mount battery, F series battery buckle plate)

Product List

	Apollo 100W	x1
	Bowens protective cover	x1
	Bowens hyper reflector	x1
	Carry case	x1
	Power adapter (Include Hanger & Wire rope)	x1
	Power cable	x1

APOLLO RGBACL Panel Lights

APOLLO

APOLLO 400W P400S RGBACL Panel Light SLC4-P400S

- Output Power: 400W
- Color temperature: 2000K-20000K
- Apollo P400S use Selens RGBACL six-color light engine provides more accurate colors
- CRI \geq 96, TLCI \geq 96, Rf \geq 94, Rg \geq 103 High Color Accuracy
- 4 independently adjustable pixels, use built-in lighting effects or via DMX control
- 4 Dimmer curves(Liner, Exp, Logarithmic, S-Curve)
- The front of the COB component is protected by glass
- Active cooling, working noise \leq 28dB
- 5 light control methods (On-Board, Art-Net, DMX, 2.4G remote, Selens Link App) support group control lighting
- Build in AC/DC power supply
- 360° rotate metal yoke, support universal head, baby pin

FLEXI PANEL Flexible Fabric Lights

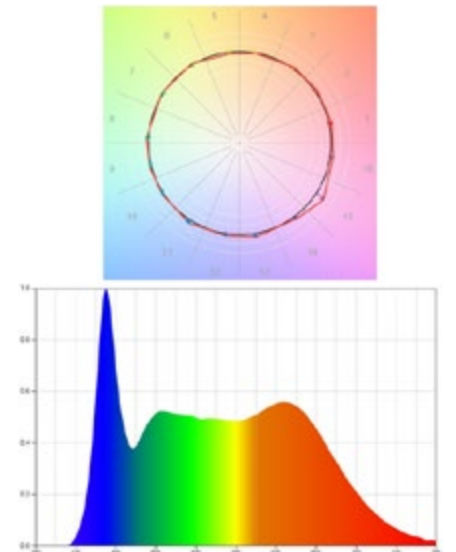

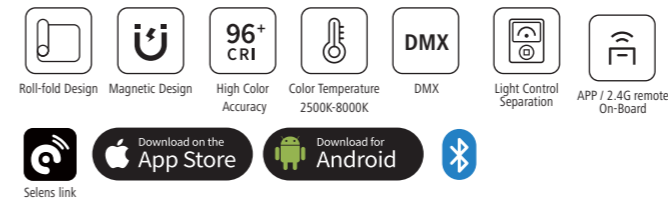

FLEXI PANEL

100W RGBWW LED Flexible Fabric Light

SLC4-FP100Spro

- Output Power: 100W
- Color temperature: 2500K-8000K
- Made of flexible light panels and fabric
- LS-100R use Selens RGBWW full-color light engine, have 36,000 colors available
- CRI \geq 95, TLCI \geq 98, Rf \geq 94, Rg \geq 103 High Color Accuracy
- 13 Lighting FX with 9 levels of adjustable effect speed
- 4 Dimmer curves(Liner, Exp, Logarithmic, S-Curve)
- 4 light control methods (DMX, control box, 2.4G remote, APP), support group control lighting
- 4 power supply methods(AC/DC power supply, V-Mount battery, F series battery buckle plate)
- A variety of soft light accessories, fixed with velcro
- 4 corners Magnetic design, adsorb to metal
- Multiple holes

Light 100W RGBWW LED Flexible Fabric Light (LS-100R)

Lighting FX	13 (Explosion, TV, Pulsing, Faulty Bulb, Strobe, Lightning, Flashlight, Flame, Fireworks, RGB, Bar, Warning, Party)
Power supply methods	AC/DC Power supply, V-Mount battery, F series battery buckle plate
Output power	100W
Color temperature	2500-8000K
100% illumination	2150Lux (@0.3m)
Light effect mode	13
CRI	\geq 95
TLCI	\geq 98
Dimming range	0%-100%
Number of LED	144
Working temperature	-10°C~40°C
Expand size	about 31x58cm
Light weight	about 920g

PROTUBE Tube Light Series

PROTUBE Tube Lights

PROTUBE RGBWW Battery-Powered LED Tube

- Color temperature: 2500K-8000K
- Use Selens RGBWW full-color light engine, provide powerful color expression
- CRI \geq 96, TLCI \geq 96, High Color Accuracy
- 20 simulated light effects to simulate various light effect scenes
- Built-in lithium battery, Type-c charging
- Supports fast charging and charging while using
- 3 control methods: On-Board, DMX, Master-slave mode
- OLED display accurately presents parameters

ALADDIN Pocket Lights

AL-Pro RGB Pocket Light

AL-ProRGB

In HSI mode, RGB colors can be adjusted 360° at will, without a color filter. Turn the dial to change the colors, and use the saturation control to create various atmospheres and scenes.

- 0~100% stepless dimming, can smoothly adjust the light brightness.
- CRI \geq 96 High color accuracy.
- HSI adjustment range of 0-360°, adjustment of saturation, easy creation of various atmospheres and scenes.
- 20 lighting scene special effects modes.
- The multi-hole design of the 1/4 and 3/8 interfaces of the magnetic arm makes it easy to connect various pan-tilts and light stands.

Edge Parabolic Reflectors

Edge Parabolic Reflector parabolic reflective structure, adjust the zoom lever back and forth can change the distance between the light source and the reflective fabric, thereby changing the light effect and making the light soft and hard controllable.

The quick-open design is easy to use. In order to be compatible with a variety of lamps, we have developed Bowens, Broncolor, Profoto, and Godox mount, which supports multiple mount replacements, improves compatibility, support your imagination!

SER-G120 Φ 120cm
SER-G150 Φ 150cm

Edge Grid

Directional light guide function, effective control of light.

Diffuser can make the light quality softer and reduce shadow contrast. Diffuser with different densities can be selected according to the needs of on-site shooting.

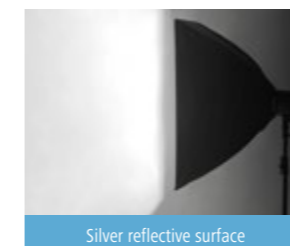

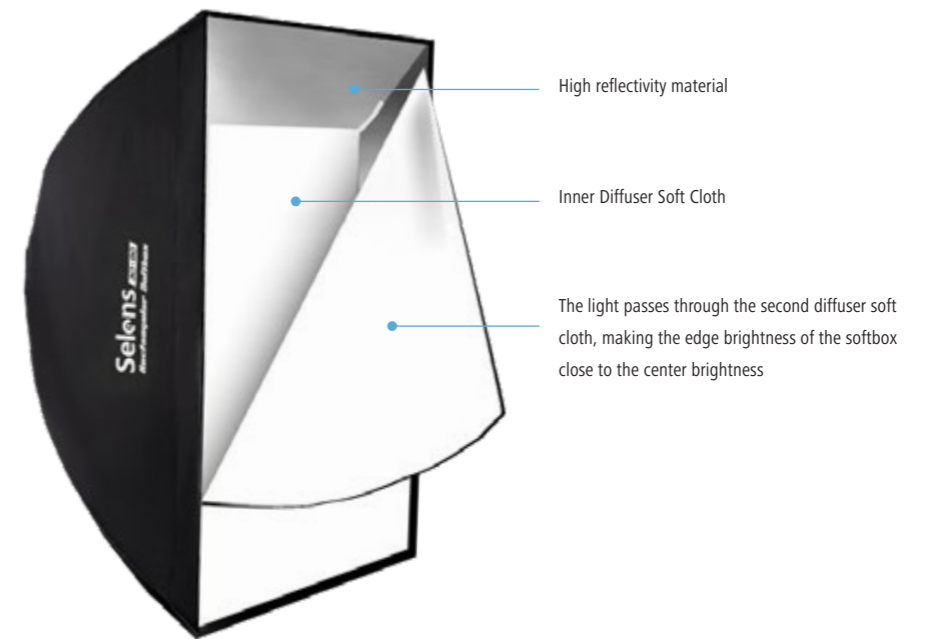

Softboxes

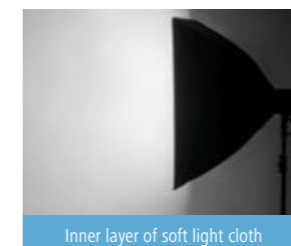

Softboxes have more sizes, accessory mounts, shapes, and quick-install models to choose.

Almost all soft boxes are equipped with double layers of soft light cloth, and some soft boxes are also equipped with three layers of soft light cloth to minimize light scattering. You can choose to use soft light cloth according to your needs to achieve different light effects.

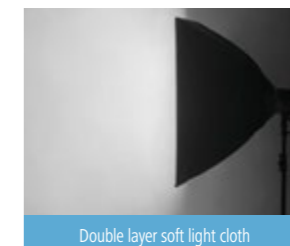

Silver reflective surface

The silver reflective surface has a high reflectivity and can be used as a large deep reflector. It has a large light ratio contrast and a strong three-dimensional effect.

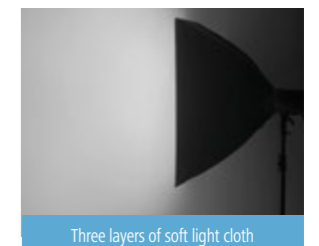

Inner layer of soft light cloth

The inner soft light cloth is located in the middle to eliminate or weaken the highlight points and make the light softer, but the edge contrast is larger.

Double layer soft light cloth

The double-layer soft light cloth further softens the light, and the contrast between the middle and edge of the soft box is reduced to less than half a stop.

Three layers of soft light cloth

The double-layer soft light cloth further softens the light, and the contrast between the middle and edge of the soft box is reduced to less than half a stop.

Quick-Folding Softboxes

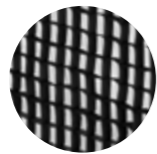

Softboxes are divided into standard softboxes and quick-folding softboxes. When using the quick-folding softbox, you can easily install and disassemble it by pulling and pressing, which is more convenient and time-saving.

Rectangle softboxes have a larger illumination area and are often used for portrait photography, still life photography, video live broadcasts and photography.

Strip softboxes are mostly used for shooting long-shaped products. They can gather the light into a long and slender highlight line, and are used to provide narrow strip-shaped highlight strips or outline for long products.

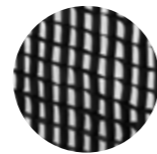

Quick-Folding Bowens Mount, install and disassemble it by pulling and pressing

SLS4-S40*200	40x200cm	89cm	2.8kg	Three layers

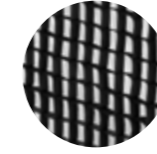

Quick-Folding Softboxes

Octagonal softboxes can create greater light effects than square softboxes, have a wider range of ambient light, and provide a wider range of lighting. They can illuminate the subject as well as the background.

Through the inner parabolic design of the circular softbox, the number of light reflections in the box is increased, which can produce clear shadows and uniform diffused light, making the shooting effect more three-dimensional. The circular softbox is easy to install and is suitable for outdoor shooting.

Softbox Grids

Honeycomb mesh is Black's Material, which is composed of small squares. It can effectively control the light source to shine from the squares, control the direction of the light, and make the light more concentrated and reduce the impact on the background. If you want to further control the light, you can use it with a honeycomb network.

Softboxes

Lantern Softbox

360° wide range of soft light, the soft light effect is comprehensive, the light starts from the center of the irradiation, and gradually weakens to the edges, with an obvious sense of layering. It is a commonly used soft light device for portrait shooting and video live broadcast, and can be used with high-power photography lights to create Space atmosphere with uniform and bright light.

Item	Size	Weight

Lantern Softbox Skirt

SER-50S Φ50cm

SER-65S Φ65cm

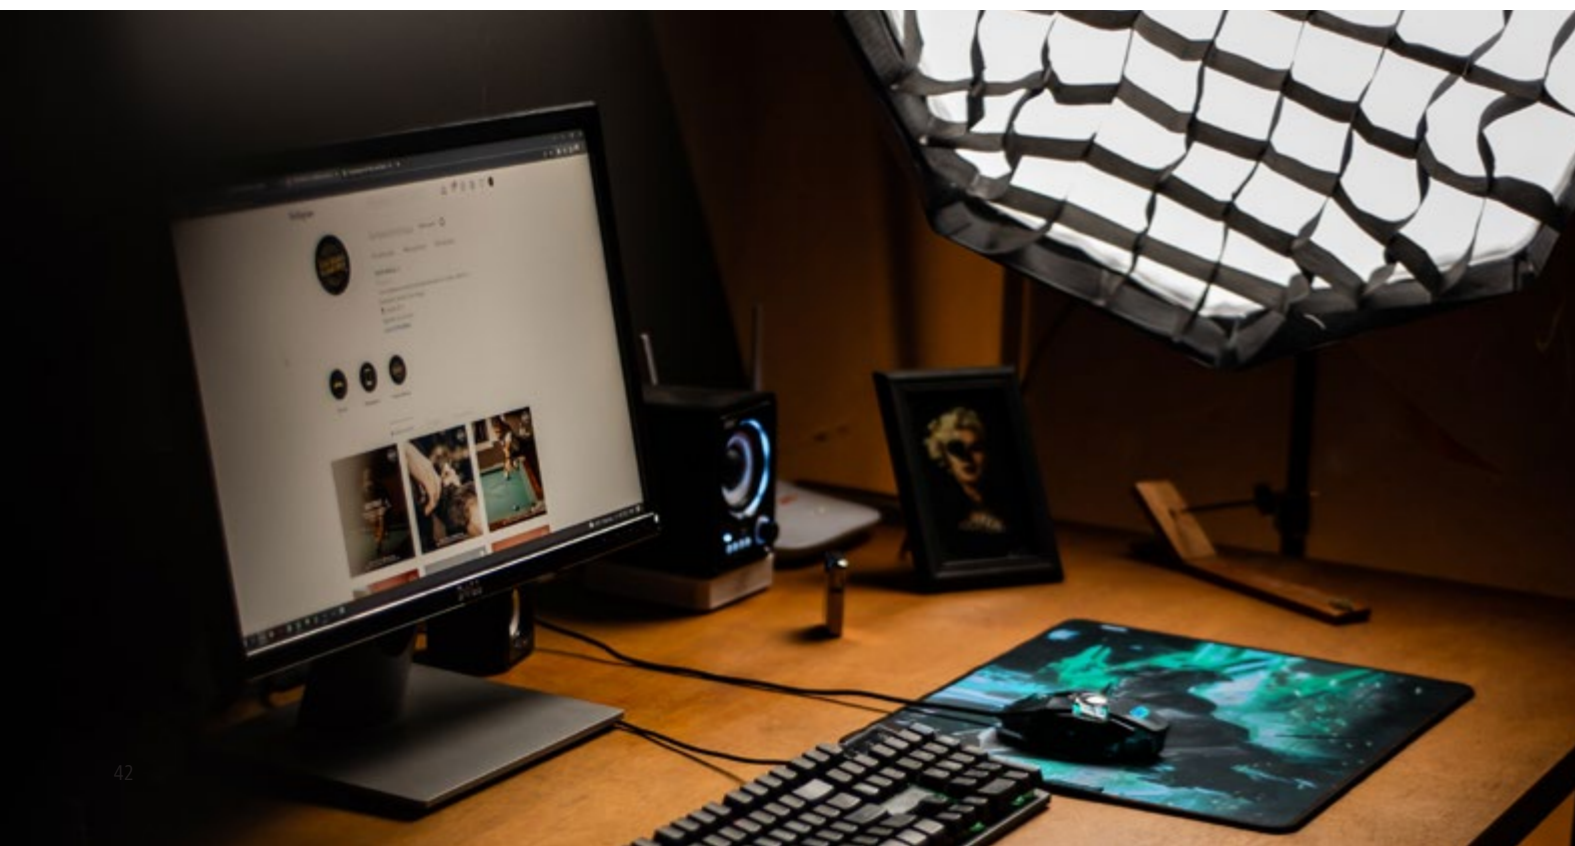

SER-80S Φ80cm

Space Light

In order to achieve better light control performance, it is equipped with removable bottom and side reflective curtains. At the same time, when used with a fixed clip, the length of the cylindrical diffuser can be changed, thereby changing the range, size and direction of the soft light, achieving flexible light control at different heights and angles. The soft light column can be freely retracted and is compact and easy to carry after folding.

Item	Size	Weight
SLS4-SL47	Φ47x70cm	0.285kg

Softboxes

Circular Black Softbox

Circular black softbox has a black reflective surface inside. The black reflective surface can reduce hot spots and highlights and increasing outlines.

Item	Size	Weight
SLS4-CB70	Φ70cm	1.55kg
SLS4-CB100	Φ100cm	1.7kg

Octagon Bounce Softbox

The light is reflected by the top reflective surface and then scattered from the side diffuser soft cloth, emitting soft light evenly and expanding the irradiation range.

Use it with a diffuser skirt to reflect light that does not need reflection to the subject and improve light utilization.

Comes with Octagon Bounce Softbox Skirt

Compact Fold-Away Butterfly Frames

The compact fold-away butterfly frame is made of aluminum alloy and foldable for easy storage

Compared with the soft box, it has a larger light source area and can create a softer light effect, whether it is softening direct sunlight in outdoor shooting, or creating a soft shadowless light effect in the studio, soft light Screens have an irreplaceable role in controlling light.

Heavy Duty Stands

The stand is made of stainless steel and aluminum alloy. It has a large opening diameter and a low center of gravity. It can bear a load of up to 35kg and can be used for heavy-duty film and television lights. 3+1 load-bearing mode, the main pole stabilizes the center of gravity when landing, and the load-bearing is more stable. The telescopic legs can be freely adjusted according to shooting needs, and can adapt to uneven roads such as stairs. Equipped with universal wheels with foot brakes, it is convenient to move heavy equipment at any time and improve efficiency.

Telescopic legs adapt to various terrains

Aluminum alloy tripod thickened design

Main pole floor-standing design, more stable load-bearing

Universal wheels with foot brake, easy to move

The low-boy stand with low center of gravity includes the Baby Pin and Universal Head, with standard storage hook

16mm Baby Pin

Stand x1

Low-Boy Stand with Universal Head

SLH4-HL1200H

Material: Aluminum Alloy+Stainless steel

Product List::

Stand x1

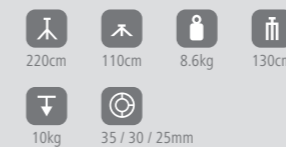

Heavy Duty Stands

The stand is made of thickened stainless steel and aluminum alloy, which has strong load-bearing capacity and can be used for heavy-duty film and television lights. The central pole can be freely raised, lowered, disassembled and assembled according to shooting needs, allowing for flexible use. An extendable leg can meet different shooting locations and provide optimal support for the lamp.
