Speco Ion processes the input from three sensors to continually monitor the Indoor Air Quality (IAQ).

### Particulate Sensor

- Uses Laser measurement for constant particulate concentration analysis

### Humidity & Temperature Sensors

- Constantly monitors the relative humidity and temperature levels within the room

## Three Coloured Active Display Current Indoor Air Quality Levels

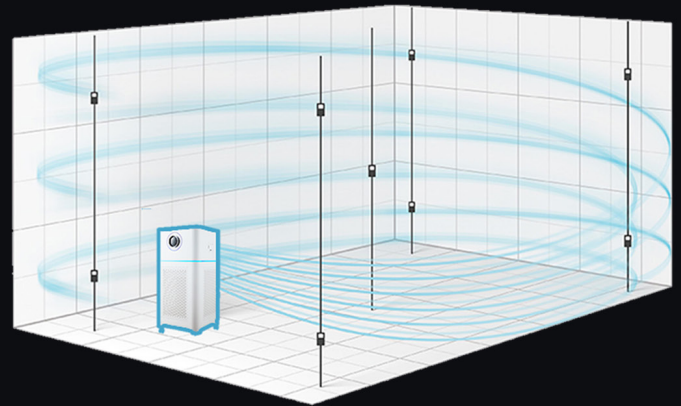

Excellent  
PM2.5 < 75

Moderate  
75 < PM2.5 < 250

Severe  
PM2.5 > 250

Three sensors precisely monitor, display and react to your air quality.

Working ultra silently at 25dBs, Speco Ion is a non-disruptive and non-invasive addition to your workplace or home.

# The Science behind Speco<sup>+</sup>

Speco<sup>+</sup> will instantly attach onto both airborne and surface germs. The germs are eliminated through oxidizing and weakening of the cell membrane and protein coat.
