Petwant was founded in January 2003 and is one of the earliest manufacturers in China to produce automatic pet feeders. It is also one of the first companies that proposed the concept of serving pets with technology to enhance their lives.

What do pets love?
What do pet owners need?
What can make pets' lives better?

We have been committed to listening to our users and meeting the needs of pets. With 20 years of exploration and development, the company has developed two major categories of products including pet feeders and pet water fountains. The sales network covers more than 80 countries and regions around the world, and has established good cooperative relationships with many well-known brands in various industries at home and abroad.
