

5V/12V BEC Manual

Description

Item name: 5V/12V 2A Switch BEC module

Input voltage: 2-6S

BEC Output: 5V/2A, 12V/2A (default 5V/2A)

Size: 6.5mm*17.5mm

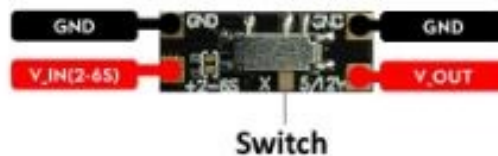

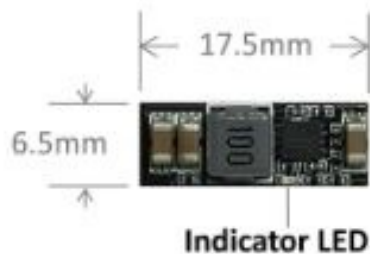

Weight: 0.8g

Features:

High-efficiency synchronous

Wide 5V to 26V Input voltage range

Voltage output can be 5V or 12V adjustable. (default 5V)

5V Mode

When the pad is not soldered, the BEC outputs a voltage of 5V. Please note that the input voltage is 2-6S.

When the pad is soldered, the BEC outputs a voltage of 12V. Please note that the input voltage is 3-6S.

12V Mode

Switch ON. The BEC will output the preset voltage and the indicator will light up

Switch OFF. The BEC stops working and the indicator light turns off
