# Model 3Y New rear smart screen H86 Android version - Troubleshooting guide for common problems

Breakdown	Causes	Solutions
Black screen (screen is not bright when installed)	The adapter harness is not connected properly	Re-plug and unplug
	After the host plug is unplugged, it is not replugged within 5 minutes	Connect the wiring harness, lock the car for 2 hours, keep the mobile phone and remote control key, more than 20 meters away from the car, check whether the screen can be lit after 2 hours
The Bluetooth cannot be connected	There is no connection to the corresponding host Blue tooth	Search for the correct blue tooth
The passenger seat won't adjust	The seat harness is unpulled	Reattach the harness
Air conditioning in the rear without air discharge	The air conditioner screen is closed	Click to turn on the air conditioner and adjust the wind speed
No sound is emitted	Maybe the Bluetooth isn't connected	Reconnect the main engine to the blue tooth, then restart the main engine of the original car
The screen function does not operate	Open the play-proof child lock	In the top right corner of the screen, swipe to hide the SOD and close the play-proof child lock
Unable to read the USB flash drive information	The USB flash drive is plugged into the wrong port	The left side is the read data interface, and the right side is the fast charge interface
The screen cannot be opened after the screen is turned off	Not in the right way
