FAULT	PROBABLE REASON AND SOLUTION:
1.The power is turned on or off with noise ;	1.This is normal because the current enters the piano .
2.When using telephone,there have some noise.	2.Please turn off the phone or keep it away when using thepiano to avoid making radiation .
3.Haven't any sound when you play the keyboard or songs .	3.Please check PHONES/OUTPUT jack if connection other equipment or not ,for example, earphone .
4.The tone is not correct or volume is too low (down).	4.Please check these settings : Main Volume ,Dual Tone Balance.
5.The sound of the tone or rhythm is abnormal.	5.Alternating Current is a bit low .
6. Some tones are of distortion .	6.The volume should be on less than 3/4 .
7.The accompaniment is incorrect	7.Confirm the accompaniment volume is at a suitable level .
8. It seems all tones work, or tones are cut off.	8.Total 81 notes of the piano work alternately, no effects, 128 polyphony if using the dual tone mode, at the same time, the accompaniment or music is playing, then some of the tones or sound will be lacked.

1 AC ADAPTOR ⚠️ **WARNING**

Misuse of the AC adapter has the danger of fire and electric shock.

- Use dedicated AC adapter.
- AC power's output voltage must be within the rated voltage.
- NO twist or pull on the power cord.
- Danger for wet hands on AC adapter
- Use only by adults, dangerous for children

2 ABNORMALITIES ⚠️ **WARNING**

Smoke, odor, or over-heated indicate danger of fire or electric shock. Hurry up.

- 1 Turn off the power.
- 2 Remove AC adapter
- 3 Contact your dealer

- The alternating current transformer will get hot when using for a long time. It is a normal phenomenon but not a failure.
- The built-in functions are tremendous and they often fail to response. Please turn off the power and turn on again and it will work properly.
