

EVALOGIK®

Outdoor Smart Plug (800S) (2 channel)

• ZW97 •

Meet your new smart plug !

(A) Manual / Program button

Press 1x: On/Off the left outlet
Press 2x: On/Off the right outlet
Hold 3s: On/Off 2 outlets simultaneously.
Press 3x: Z-Wave inclusion (blue light blinking)
Press 3x: Z-Wave exclusion (purple light blinking)

For outdoor use IP65 rated

Factory Reset: Press the button twice quickly and then hold a 3rd press for 10 seconds.

(B/C) Smart Outlet

Those are your smart outlets that will be included to your smart Hub/Gateway.

Specifications

Power: 120VAC, 60Hz
Loading : 15 Amp Smart Outlet*2
Total(Both Outlets): 15 Amp Max
Frequency: 908.42 MHz
Operating Temperature: -4° F~122° F

Use our screws and anchor to lock it in the wall. (optional)

Z-Wave Internet

The Internet of Things offers tremendous promise to consumers by enabling remote control and management of an ever-growing variety of connected devices—from home security systems to energy management, appliances and lighting, and remote home monitoring, just to name a few categories.

Analysts predict that billions of devices will be connected to the Internet of Things in the coming years. One key consideration is how all of these devices will be integrated and controlled, and common standards are key to enabling simple, straight forward installation and management of devices in the connected home.

The Z-Wave protocol is an interoperable, wireless, RF-based communications technology designed specifically for control, monitoring and status reading applications in residential and light commercial environments. Mature, proven and broadly deployed (with over 100 million products sold worldwide), Z-Wave is by far the world market leader in wireless control, bringing affordable, reliable and easy-to-use 'smart' products to many millions of people in every aspect of daily life.

Adding Device To Z-Wave Network for QR CODE

Scan here for SmartStar inclusion
Note: FULL DSK can be found on the packaging box.
Do not remove or damage them.

Introduction

The EVA LOGIK ZW97 is a Z-Wave enabled 15A receptacle designed for using of most residential lighting and motor applications. It's compatible with LED, halogen, incandescent, xenon, fluorescent and compact fluorescent bulbs. The ZW97 fully works with the Fibaro, Smartthings, Wink hub as well as all other certified Z-Wave controllers. One Z-Wave controlled AC outlet for standard incandescent lighting, CFL/LED. Total load capacity for both outlets is 15A(1800W) Resistive.

Plug the device you want to control into the Z-Wave Smart plug controlled outlet.
NOTE: Plug directly into outlet, do not use with extension cords.

Note:

Include the device to the network within 10 feet of the controller when adding to the controller then relocate it to the desired position in your home, no more than 100 feet distance from controller. Be sure to refresh the network while the device is included in this manner.

Adding Device To Z-Wave Network

1. Follow the instructions for your Z-Wave certified controller to add a device to the Z-Wave network.
2. Once the controller is ready to add your device, **press the button 3 times quickly**. The Blue LED will blink quickly.

Blue LED indicator

Now, you have complete control to turn your fixture ON/OFF according to groups, schedules and interactive automation programmed by your controller. If your Z-Wave certified controller features remote access, you can control your fixture from your mobile devices.

Again:

If you have issues with pairing/inclusion, please move the device as close as possible to the hub and try again—you can move to your final location when completed.

Note:

If the manual button(A) doesn't light up after pressed 3 times, please reset the device: **Press the button twice quickly and then hold a 3rd press for 10 seconds**. This operation could be done when manual control is functional—single press can turn on/off the lamp.

To Remove The Device

1. Follow the instructions for your Z-Wave certified controller to remove a device from the Z-Wave network.
2. Once the controller is ready to remove your device, **press the manual/program button(A) on the smart plug 3 times quickly**.

To Return The Device To Factory Defaults:

Manual: **Press the button twice quickly and then hold a 3rd press for 10 seconds**.
Host reset: Remove it from the host connection and the device will factory reset.

To Add LR:

The device is compatible with SmartStart.

• SmartStart-enabled products can be added to a Z-Wave network by scanning the Z-Wave QR Code found on the top of the outlet or the back of the box with a controller providing SmartStart inclusion. No further action is required and the SmartStart product will be added automatically within 10 minutes of being switched on and in the network vicinity.

• Note: Z-Wave Long Range device can only support be included via SmartStart. Extract the DSK from the device and paste it into the DSK Value in PC Controller, making sure the Long Range' option is ticked.

Parameter Settings

Parameter = 1 --- LED indicator (quickly press 6x to change Parameter)
size =1 byte, Range=0~2
value=00 (default) out on, led on,
value=01 out on, led off
value=02 led no work

Parameter = 2 --- EP 1 Auto Timer OFF: Switch off "left outlet"
Size=4 byte, Range=0~65535
Values:0 - 65535 (Min);

Parameter = 3 --- EP 2 Auto Timer OFF: Switch off "right outlet"
Size=4 , Range=0~65535
Values:0 - 65535 (Min)

Parameter = 4 --- EP 1 Auto Timer ON: Switch On "left outlet"
Size=4 , Range=0~65535
Values:0 - 65535 (Min);

Parameter = 5 --- EP 2 Auto Timer ON: Switch On "right outlet"
Size=4 , Range=0~65535
Values:0 - 65535 (Min)

Parameter = 6 --- Restores state after power failure(quickly press 10x to change Parameter)
Size=1 , Range=0~2
Value=0 output off
Value=1 output on
Value=2 output restore the last state after power failure (default)

Parameter = 7 --- Custom LED brightness (quickly press 8x to change Parameter)
Size=1 , Range=0~2
Value=0 Bright
Value=1 Medium
Value=2 Low (default)

FCC / IC

This device complies with part 15 of the FCC and Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION - PLEASE READ!

This device (ZW97) is intended for installation in accordance with the National Electric Code and local regulations in the United States, or the Canadian Electrical Code and local regulations in Canada. If you are unsure or uncomfortable about performing this installation consult a qualified electrician.

WARNING - SHOCK HAZARD

TURN OFF THE POWER to the circuit for the switch and lighting fixture at the service panel (circuit breaker) prior to installation.
ALL WIRING CONNECTIONS MUST BE MADE WITH THE POWER OFF to avoid personal injury and/or damage to the switch.

OTHER WARNINGS

Risk of Fire
Risk of Electrical Shock
Risk of Burns

WARRANTY

Our Products warrants this product to be free from manufacturing defects for a period of one year from the original date of consumer purchase. This warranty is limited to the repair or replacement of this product only and does not extend to consequential or incidental damage to other products that may be used with this product. This warranty is in lieu of all other warranties, expressed or implied. Some states do not allow limitations on how long an implied warranty lasts or permit the exclusion or limitation of incidental or consequential damage, so the above limitations may not apply to you. This warranty gives you specific rights, and you may also have other rights which vary from state to state.

Z-wave Interoperability

This product can be included and operated in any Z-Wave network with other Z-Wave certified devices from other manufacturers and/or other applications. All non-battery operated nodes within the network will act as repeaters regardless of vendor to increase reliability of the network.

This Device supports lifeline (association group 1) supporting 1 node for lifeline communication. Group 1 must be assigned the Node ID of the primary controller where unsolicited notifications will be sent. The Z-Wave controller should set this association automatically after inclusion. Lifeline association only supports the "Device Reset Locally" function. Refer to the instructions of your controller for any available details on how this can be set.

If you have any questions, please contact us at ask@evalogik.com

FCC NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Important note: To comply with the FCC RF exposure compliance requirements, no change to the antenna or the device is permitted. Any change to the antenna or the device could result in the device exceeding the RF exposure requirements and void user's authority to operate the device.

MEDICAL EQUIPMENT

Please DO NOT use this switch to control Medical or Life Support equipment. Z-Wave devices should never be used to control the On/Off status of Medical and/or Life Support equipment.

CONTROLLING APPLIANCES

Please exercise EXTREME CAUTION when using Z-Wave devices to control appliances. Reason being is because the appliance you want to control may be in a separate room and if unintentional behavior occurs (such as a device turning on or off - either intentionally via schedules, or unintentionally via network error) this event may lead to a hazardous condition. For these reasons, please note the following suggestions:

- 1) Do not include Z-Wave devices in Groups or Scenes if they control appliances.
- 2) Do not use Z-Wave devices to control electric heaters or any other appliances which may present a hazardous condition due to unattended, unintentional, or automatic power control
