PLANTATION SUR BALCON

1

Remplissez le pot de 4/3 de sol nutritif et arrosez-le avec un arrosoir jusqu'à ce qu'il soit humide.

2

Placez les graines sur le sol nutritif et couvrez-les d'une fine couche de terre.

3

Utilisez un arrosoir pour arroser le sol nutritif avec des jus jusqu'à ce qu'il soit humide.

4

Attendez que les graines se développent. En hiver, les graines se développent plus lentement.

5

Quand les graines germent (en automne, froid et sol nutritif, les graines germent plus vite).

6

Transplantez dans un grand pot (autres zones) de la lumière, d'autres zones.

Seed sowing in three steps, step 1: Prepare the soil, step 2: Sow the seeds, step 3: Water the seeds. The first step is to prepare the soil, the second step is to sow the seeds, and the third step is to water the seeds.

1. First, prepare a plate and lay a piece of tissue paper inside.

2. Pour water, just moisten the tissue paper, not too much.

3. Place the seeds, here are flower seeds and gourd seeds.

4. Cover with a film to keep

5. White spots appear,

6. Look, the seeds germinate

Transplant to a large pot (other areas) to provide light, water and air.

Seed sowing steps, step 1, place the seeds in a container, then the seeds will be in the container. The first step is to place the seeds in the container. The second step is to place the seeds in the container. The third step is to place the seeds in the container. The fourth step is to place the seeds in the container. The fifth step is to place the seeds in the container. The sixth step is to place the seeds in the container. The seventh step is to place the seeds in the container. The eighth step is to place the seeds in the container. The ninth step is to place the seeds in the container. The tenth step is to place the seeds in the container. The eleventh step is to place the seeds in the container. The twelfth step is to place the seeds in the container. The thirteenth step is to place the seeds in the container. The fourteenth step is to place the seeds in the container. The fifteenth step is to place the seeds in the container. The sixteenth step is to place the seeds in the container. The seventeenth step is to place the seeds in the container. The eighteenth step is to place the seeds in the container. The nineteenth step is to place the seeds in the container. The twentieth step is to place the seeds in the container. The twenty-first step is to place the seeds in the container. The twenty-second step is to place the seeds in the container. The twenty-third step is to place the seeds in the container. The twenty-fourth step is to place the seeds in the container. The twenty-fifth step is to place the seeds in the container. The twenty-sixth step is to place the seeds in the container. The twenty-seventh step is to place the seeds in the container. The twenty-eighth step is to place the seeds in the container. The twenty-ninth step is to place the seeds in the container. The thirtieth step is to place the seeds in the container. The thirty-first step is to place the seeds in the container. The thirty-second step is to place the seeds in the container. The thirty-third step is to place the seeds in the container. The thirty-fourth step is to place the seeds in the container. The thirty-fifth step is to place the seeds in the container. The thirty-sixth step is to place the seeds in the container. The thirty-seventh step is to place the seeds in the container. The thirty-eighth step is to place the seeds in the container. The thirty-ninth step is to place the seeds in the container. The fortieth step is to place the seeds in the container. The forty-first step is to place the seeds in the container. The forty-second step is to place the seeds in the container. The forty-third step is to place the seeds in the container. The forty-fourth step is to place the seeds in the container. The forty-fifth step is to place the seeds in the container. The forty-sixth step is to place the seeds in the container. The forty-seventh step is to place the seeds in the container. The forty-eighth step is to place the seeds in the container. The forty-ninth step is to place the seeds in the container. The fiftieth step is to place the seeds in the container. The fifty-first step is to place the seeds in the container. The fifty-second step is to place the seeds in the container. The fifty-third step is to place the seeds in the container. The fifty-fourth step is to place the seeds in the container. The fifty-fifth step is to place the seeds in the container. The fifty-sixth step is to place the seeds in the container. The fifty-seventh step is to place the seeds in the container. The fifty-eighth step is to place the seeds in the container. The fifty-ninth step is to place the seeds in the container. The sixtieth step is to place the seeds in the container. The sixty-first step is to place the seeds in the container. The sixty-second step is to place the seeds in the container. The sixty-third step is to place the seeds in the container. The sixty-fourth step is to place the seeds in the container. The sixty-fifth step is to place the seeds in the container. The sixty-sixth step is to place the seeds in the container. The sixty-seventh step is to place the seeds in the container. The sixty-eighth step is to place the seeds in the container. The sixty-ninth step is to place the seeds in the container. The seventieth step is to place the seeds in the container. The seventy-first step is to place the seeds in the container. The seventy-second step is to place the seeds in the container. The seventy-third step is to place the seeds in the container. The seventy-fourth step is to place the seeds in the container. The seventy-fifth step is to place the seeds in the container. The seventy-sixth step is to place the seeds in the container. The seventy-seventh step is to place the seeds in the container. The seventy-eighth step is to place the seeds in the container. The seventy-ninth step is to place the seeds in the container. The eightieth step is to place the seeds in the container. The eighty-first step is to place the seeds in the container. The eighty-second step is to place the seeds in the container. The eighty-third step is to place the seeds in the container. The eighty-fourth step is to place the seeds in the container. The eighty-fifth step is to place the seeds in the container. The eighty-sixth step is to place the seeds in the container. The eighty-seventh step is to place the seeds in the container. The eighty-eighth step is to place the seeds in the container. The eighty-ninth step is to place the seeds in the container. The ninetieth step is to place the seeds in the container. The ninety-first step is to place the seeds in the container. The ninety-second step is to place the seeds in the container. The ninety-third step is to place the seeds in the container. The ninety-fourth step is to place the seeds in the container. The ninety-fifth step is to place the seeds in the container. The ninety-sixth step is to place the seeds in the container. The ninety-seventh step is to place the seeds in the container. The ninety-eighth step is to place the seeds in the container. The ninety-ninth step is to place the seeds in the container. The hundredth step is to place the seeds in the container.

1. First, prepare a plate and lay a piece of tissue paper inside.
