Plan the rhythm before you string.

25 positions | 17 lapis lazuli + 4 yellow tiger eye + 4 clear quartz

The repeat

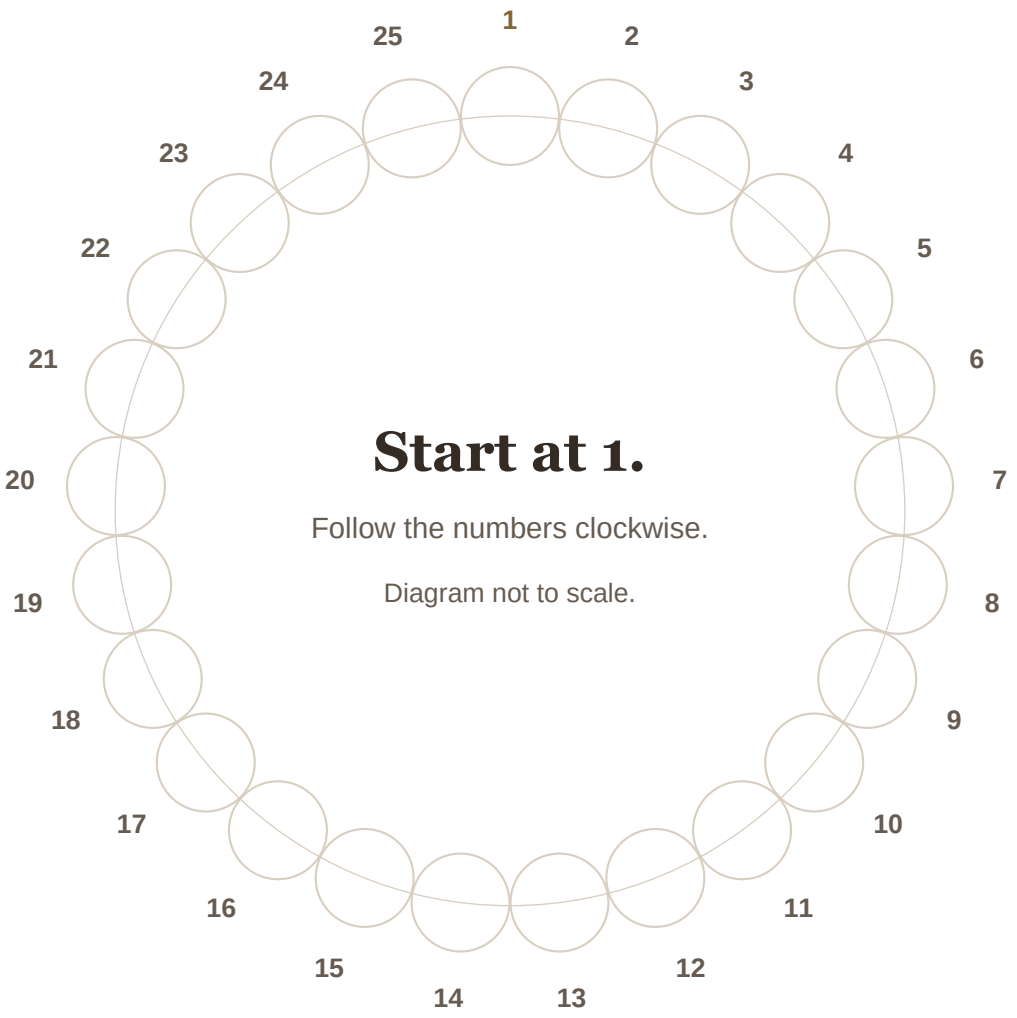

Repeat lapis, lapis, tiger eye, clear quartz, lapis, lapis four times. Add one lapis at position 25. Tiger eye: 3, 9, 15, 21. Clear quartz: 4, 10, 16, 22.

Check the join: positions 24, 25, 1 and 2 are all lapis. That longer blue run belongs to this plan; it is not a counting error.

This is the actual selected sequence from our October 6 Builder demonstration, using our online bead images. The selected bead size was nominal 8mm; the 17cm wrist input was an example setting. Natural beads vary. This diagram does not measure a finished bracelet or teach a tested knot.

Try your own arrangement.

A blank 25-position worksheet. Keep a record of the changes you make.

Your materials

A: _____ Count: _____

B: _____ Count: _____

C: _____ Count: _____

Selected bead size: _____ Measured wrist: _____

25 positions are for exploring this example. Recalculate the bead count for your own beads and fit. Check the closing pair 25 to 1 before assembly.

Keep the complete bead order.

Before a physical bracelet

Measure the wearer's wrist and check the actual bead diameters, holes, cord and construction. This sheet records a layout; it does not prove physical fit. Use the current quote in Studio if you choose to order.
