

STONE WHISPER

Measure your wrist.

US Letter | 8.5 x 11 in

1 PRINT AT 100%

Choose US Letter paper. Select Actual size or 100% scale. Turn off Fit, Shrink and multiple pages per sheet. Use plain paper.

2 CHECK THE SCALE

Before cutting, measure the check line below with a ruler. It must be 100 mm (10 cm). If it is not, do not use this printout. A screen image is not a ruler.

3 WRAP AND MARK

Cut around the dashed outline. Hold the ZERO line at your starting point and wrap the numbered strip where you wear the bracelet, close to the skin without pulling tight. Mark the numbered section where it returns to the ZERO line. A second person can help.

4 READ YOUR WRIST MEASUREMENT

Remove the strip and read your mark in centimeters. Each small division is 1 mm (0.1 cm). Check the measurement again before ordering. Do not guess if the mark is unclear.

PRINT SCALE CHECK

This is your wrist, not the finished loop.

Enter your actual wrist measurement in the Studio. Do not add an allowance unless a field asks for the finished bracelet measurement. For a finished strand, check its own size notes. This strip cannot guarantee bracelet fit.

My wrist: _____ **cm**

Strip too short, no printer or scale not verified? Use a flexible measuring tape, or non-stretch paper/string and a separate ruler. The full sizing guide is at the link below.
