# TIPS

1. Pack it according to material drawing No. A, B, C.... A few materials will be packed in the package box directly due to over material dimension or special protection(More No. A material). Some will be packed together.
2. Please prepare tools, such as scissors, straightedge, ruler, needlework, etc.
3. Please cut the paper and cloth according to the template or dimensioning in order to avoid mistakes.
4. The actual measurement dimension and the material identification dimension may vary 2-3 mm due to manual polishing and different measurement tools. It is a normal phenomenon.
5. Small derivations of the material colors and shapes of the beads due to different batches of wood and cloth subject to change without notice.
6. The color of the instruction manual will have little deviation from the actual color. Please according to the real object.
7. Children should be accompanied by adults to make.
8. Please refer to the operation, test whether the lamp bulb can be ON and distinguish the positive and negative electrode.

 Connect conducting wire on the battery with hand directly is not allowed.

 Testing bulbs must be connecting box, wrap the connection point with tape.
