Out frame combination

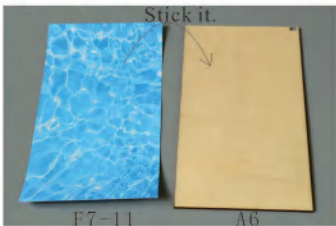

Cut paper accessory **F7-5** and apply white latex to wood **A1** evenly. Stick the paper accessory to the wood when the white latex is dried. Squeeze the air bubble gently with a piece of clean facial tissue to make the paper accessory match the wood. (The method is also applicable to the sticking of wood and paper accessory.)

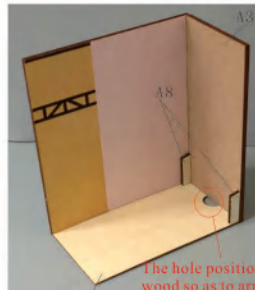

F7-6

A1 (Another piece)

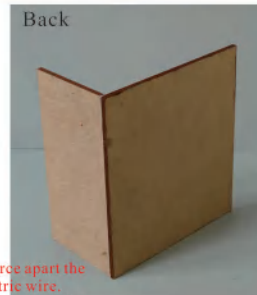

F7-11

A6

The hole position is used to force apart the wood so as to arrange the electric wire.

A7 (Apply a small amount of glue on the corner pin so that the wood cannot fall off.)

TIPS

1. Pack it according to material drawing No. A, B, C.... A few materials will be packed in the package box directly due to over material dimension or special protection(More No. A material). Some will be packed together.
2. Please prepare tools, such as scissors, straightedge, ruler, needlework, etc.
3. Please cut the paper and cloth according to the template or dimensioning in order to avoid mistakes.
4. The actual measurement dimension and the material identification dimension may vary 2-3 mm due to manual polishing and different measurement tools. It is a normal phenomenon.
5. Small derivations of the material colors and shapes of the beads due to different batches of wood and cloth subject to change without notice.
6. The color of the instruction manual will have little deviation from the actual color. Please according to the real object.
7. Children should be accompanied by adults to make.
8. Please refer to the operation, test whether the lamp bulb can be ON and distinguish the positive and negative electrode.
