AUTOMATIC PET FEEDER WITH WIFI

Manual

Please read carefully before using the product

Assemble and Use

01 Filling Food Tank:

Fill food tank with dry pet food. Close the lid and it will snap into place due to gravity.

1) Do NOT use canned, wet or moist pet food.

2) Recommend kibble size ranging from 2-10mm/ 0.07-0.4in in diameter.

02 Placing Desiccant Bag:

The desiccant bag can remove the moisture and odor inside the tank, protect the pet food from oxidation damage, and always be fresh.

Note:
1) It's recommended to use a desiccant bag and change them every 15 days in case of mold.
2) Please remove the desiccant bag before cleaning the lid.

3) For a better antioxidant effect, tear off the sealing film outside the small package only when you use it.

03 Assembling Bowl Holder& the Bowl:

Put the bowl holder and bowl out from the feeder food tank and install them in the correct position.

Connecting Power:

- Insert the 5V power adapter into a wall socket. Plug in the power socket of the feeder. Open the battery compartment at the bottom of the unit, and install 3 alkaline D batteries (not included) in case of outage.
- ·The LCD display will light up automatically indicating the feeder is on now.

- 2) Before connecting to power, make sure all parts are clean and completely dry.
- 3) The battery should power with an output of 4-5V; the battery level icon on the display blinks on a low

Simple trouble shooting of pet feeder

- O1 Please check if you can't connect. a): The WiFi name and password should not be in Chinese or more than 12 digits . Please use combination of numbers and letters . 5G WiFi signal is not supported. Please use 2.4G WiFi signal. b): Some community broadband, radio and television broadband, multi-level network or mobile Tietong network, due to network restrictions, the feeder can not connect to the network server, so it is recommended to use Telecom or Unicom Network. c): Some software conflicts in the phone will also cause connection failure. Please restart the phone. Turn off the non mobile system software that starts with the phone, turn on Bluetooth and location, and then try reconnecting to the feeder.
- 1f the feeding device is inaccurate or not feeding, please check whether there is too much food in the food plate and whether the food channels is blocked. Please clean the food outlet and channels. When using the battery power supply, please check whether the battery is dead and whether the battery leaks.
- The device shows offline. Please check the distance between the device and the router at home. Do not exceed 10 meters. Try not to partition the middle. According to WiFi characteristics, the WiFi signal on the partition wall will drop sharply, resulting in unstable connection offline.
- of there is no response after starting the machine, check whether the power supply is plugged in and whether the power switch is turned on. If they are all plugged in, please check whether the power supply is damaged, contact customer service to buy the power supply or return to the factory for maintenance according to the judgment.

(1). There is a Low Battery indicator on the left side of the control panel. When you go out or on a business trip, make sure if the voltage indicator light is on. If there is a light or flashing light when discharging or sounding, please replace the battery in time to prevent your pet from starvation.

- (2).Do not put your fingers into the machine at any time.
- (3). This product uses 3xD alkaline batteries.
- (4). Please dispose of old batteries in accordance with national regulations (pay attention to environmental protection). When the feeder is not used for a long time, please remove the battery to prevent the electrolyte from
- Do not add semi-dry or wet pet food, this product can only use dry pet food. If you have any questions, please contact us at support@voluas.com

How to clean the feeder

This product cannot be placed outdoors or exposed to the rain. Please use a wet cloth to clean it and prevent water from entering the feeder. If you need to open the food tank, please pull out the head of the robot with strength. The food tank and food bowl can be washed by water.

Please configure according to the diagram in the manual. If the configuration is not successful, please switch to AP and connecting the hotspot signal, return to app and wait for the connection to complete.
