Pet Fountain

Before we start: Care instructions

To keep providing fresh, clean water for your pet, remember these three simple tasks:

Refill often.

Keep the water level up. The pump is designed to work in at least one inch of water. The pump can fail if it runs dry.

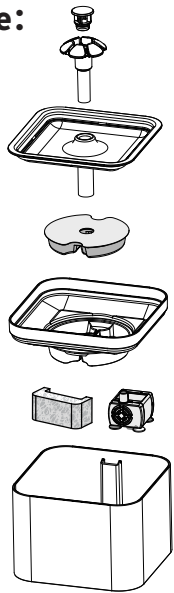

Clean your pump and your fountain.

Take your pump and fountain apart to clean with soap and water every two to four weeks. Be careful not to get soap in the filters, as it will not rinse out.

Replace your filters.

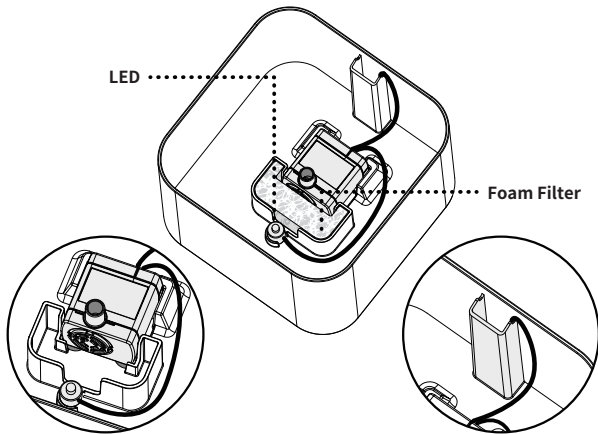

Replace the carbon filter every four weeks when you clean your fountain.
Replace the foam filter every two months.

What you have:

Setup instructions

❶ Schematic diagram for pump instillation

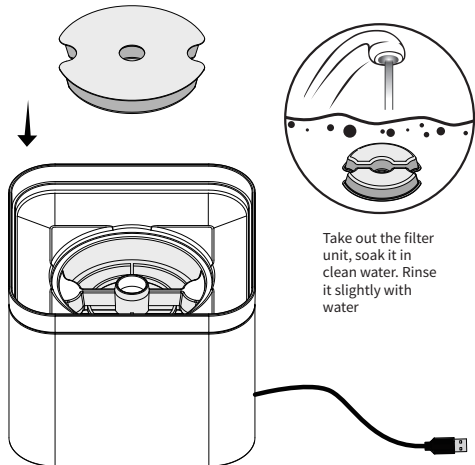

Put the pump according the direction

Put the cord in the notch

背面

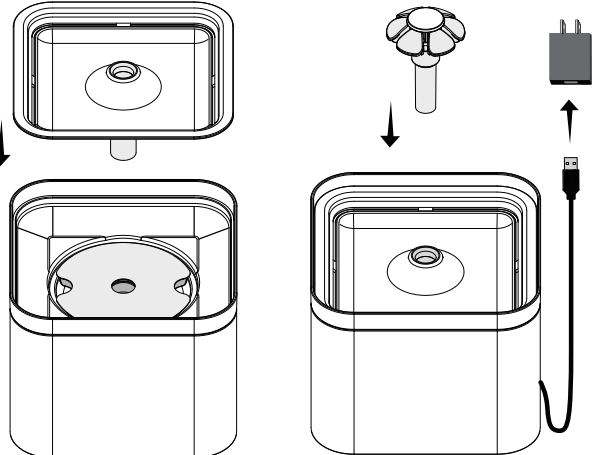

❷ Install the filter:

Install the filter the filter tray

Take out the filter unit, soak it in clean water. Rinse it slightly with water

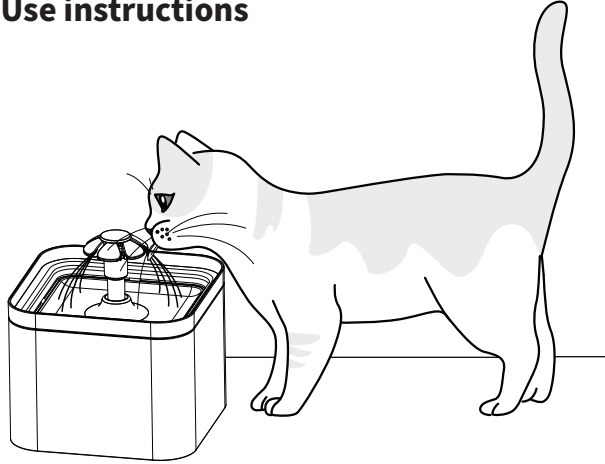

❸ Install the lid & flower

Install the lid

Install the flower in sequence, connect the power adaptor

Use instructions

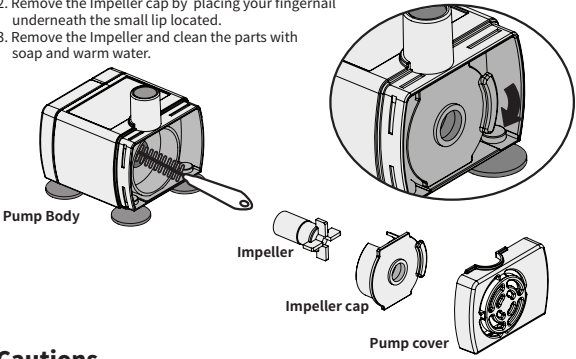

Place the fountain where your pet will use it. Fill the vessel with water, leaving a half inch of space between the water and the rim. Make sure your hands, the cord and the power adaptor are dry.

Keep health and happiness flowing!

To extend product life, please clean the pump every 2 weeks.

1. Remove the Pump Cover
2. Remove the Impeller cap by placing your fingernail underneath the small lip located.
3. Remove the Impeller and clean the parts with soap and warm water.

Cautions
