Manual Feed
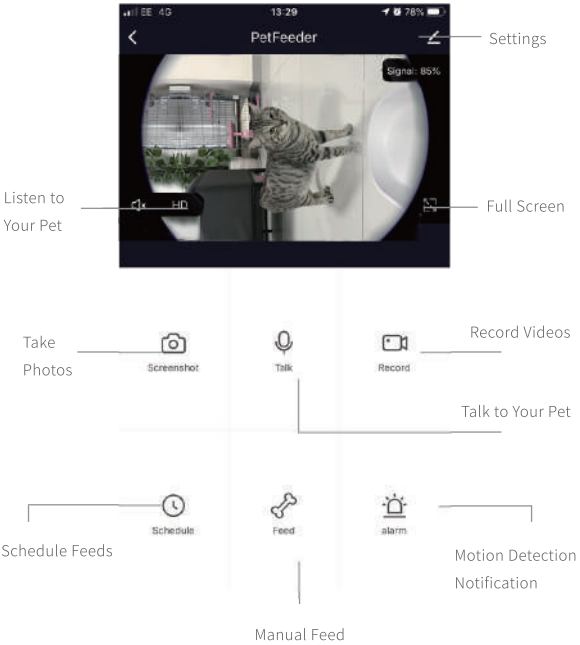

Note: Android page will be different from IOS page. The functions settings can be easily reach out.

Program Your Feedings

Click "Schedule" to add feeding times. Here you can set different feeding times and portions. You can set up to 4 meals and 10 portions per meal.

In the overview of all feeding times, you can simply activate or deactivate individual feeding times.
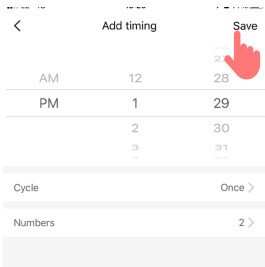

Manual feeding

1. Press "Feed" and choose the number of portions that you want to give out right now.
2. By pressing "Short Record" you can record a 10-second long audio message. This is played at meal time to get your pet's attention.

Motion detection

Under "Alarm" you can activate the motion detection of your camera to receive notification when your pet approaches the dispenser.

Other settings
You can access additional features by going into the settings menu. These are:
- Checking the feeder's status.
- Activating IR (night) vision
- Activating and deactivating motion detection
- Flipping the display on the screen
- Sharing your device with others
- You can also set the audio mode to one-way or two-way

Notifications centre

Under "Me" and "Message Centre" you can activate or deactivate notifications and manage these.

If you activate notifications, you get messages at each feeding time or if the feed container is empty, and also when your pet approaches the feeder.
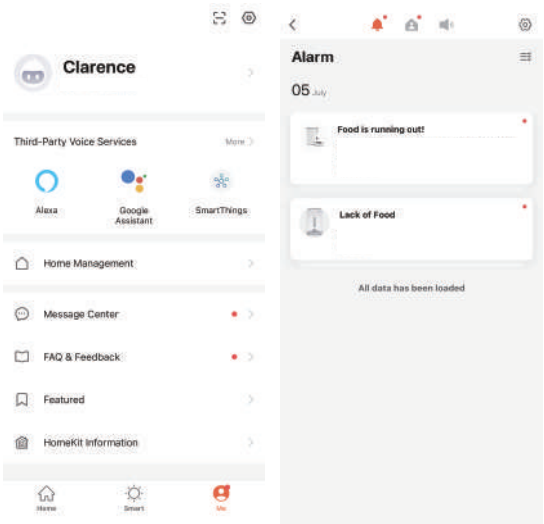

Important safaty instructions

Read all of the instructions below before using this product. Do not make any changes or create settings that are not described in this manual.
If physical injury, loss of data or damage is caused by failure to follow instructions, the warranty does not apply.

- This product can be used by children aged from 12 years above and persons with reduced physical,sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of this product in a safe way and understand the hazards involved.
- Do not place anything on the top of the product.
- Do not expose the product to the temperature lower than 20℃.
- Ensure the desiccant package is intact before use to avoid it mixing with food.
- The product can only hold dry pet food with a diameter of 5 to 20mm.
- If the adapter is getting wet, cut off power. Never unplug the glove without insulating gloves. Contact our Customer Support to purchase a replacement.
- To avoid electric shock, do not place the power cord or plug in water or other liquids. Only use a power cord that is recommended or sold by the product manufacturer.
- Dispose of packaging properly. Some components may be packed in poly bags which can cause suffocation. Keep them away from children and pets.
- When the batteries are running low, replace them immediately; or the battery corrosion will damage the product.
